Professional Summary

Full-Stack Web Developer with 18+ months of professional experience building custom web applications and data-driven solutions. Combines strong technical skills in React, C#/.NET, and SQL with design expertise to create user-focused, scalable applications. Proven ability to manage complex client projects from wireframing through deployment, with experience in custom WordPress development, API integration, and database architecture.

Technical Skills

Frontend: JavaScript, HTML5, CSS3, React.js, WordPress
Backend: C#/.NET, SQL Server, PHP, REST APIs
Tools: Git/GitHub, Visual Studio, Postman
Design: Adobe Photoshop, Illustrator, Figma

Professional Experience

Junior Web & Graphic Designer

Tangram 3DS | Kittery, ME | August 2024 - Present

Complex WordPress Development & Custom Solutions:

- Built data-driven websites with custom post types, taxonomies, and field relationships using Advanced Custom Fields, requiring extensive content architecture and dynamic templating
- Developed custom components with JSON parameter mapping for Cornerstone page builder, including reusable global modules and advanced CSS/JavaScript functionality

- Implemented website optimization strategies including caching, script preloading, and WebP image conversion for improved performance

Full-Stack Client Project Management:

- Lead technical development for 6+ client projects from wireframing through deployment, managing stakeholder communication and iterative feedback cycles
- Created information architecture, sitemaps, and prototypes for complex applications including teledermatology startup and music events platform
- Developed custom JavaScript solutions for enhanced UX, including dynamic anchor navigation and interactive components

Data Management & Integration:

- Designed and executed data migration strategies using spreadsheet analysis and custom field mapping for bulk content uploads
- Integrated third-party APIs including HubSpot and Google Analytics with focus on SEO optimization and accessibility compliance
- Built custom PHP functionality for advanced content relationships and dynamic filtering systems

Motion Designer (Permalance)

KG V Studios | Nashville, TN | March 2024 - August 2024

- Developed art direction and storyboard concepts for Nashville Wire product promotion video series
- Created kinetic typography and motion graphics using After Effects, working on-site with production team
- Managed feedback integration through Director of Post Production and Lead Producer for client approval

Full-Stack Developer Apprenticeship

Nashville Software School | Nashville, TN | February 2023 - August 2023

- Built single-page applications with full CRUD functionality using React, JavaScript, and JSON Server for REST API development

- Developed Web APIs and backend servers using .NET stack with SQL Server for full-stack applications
- **Capstone Projects:** CookiJar (productivity/task management app), ShoptheBlock (e-commerce platform)
- Managed development workflows using Git, GitHub, issue tracking, and remote collaboration

Art Director Internship

Rocket Mortgage | Remote | February 2021 - August 2021

- Developed cross-channel campaign concepts for social media, video, broadcast, and digital communications
- Collaborated with copywriters and creative directors on creative solutions for national campaigns
- Supported production for NCAA + Rocket Mortgage national television commercial shoot

Digital Media Manager

Lost Girls | Chicago, IL | November 2019 - February 2021

- Built and launched e-commerce website that tripled company profit post-pandemic
- Managed online sales channels including inventory systems, order processing, and customer service
- Created digital marketing content and conducted product photography for multi-channel campaigns

Education

Full-Stack Web Development Certificate

Nashville Software School | February 2023 - August 2023

6-month intensive software development bootcamp focused on full-stack .NET applications

Bachelor of Fine Arts

School of the Art Institute of Chicago | 2012 - 2016

Film, Video, New Media & Animation | Dean's List, Goldman Sachs Scholar

Featured Projects
